GOLF CARS

FEEL THE PASSION. HONOR THE GAME.

We all feel it. It's the passion we have for the game of golf. At Club Car, we try to capture that passion every day. It's at the core of everything we do as we develop creative business solutions for our customers around the world. And because we're all committed to the future and prosperity of the sport we love, the people of Club Car have dedicated themselves to a simple philosophy: Honor the game. In every way we can. That's why we've chosen to build partnerships with organizations that truly care about the game. That's why we're driven to build the industry's finest vehicles. And that's why, supported by a full range of creative business solutions,

we're focused on helping our customers find success. Club Car is committed to you – and your investment. We'll prove it every day with an intimate understanding of the issues and challenges you face. And we'll find solutions that will make a real difference for you and your customers. To us, golf is much more than simply our business. At the end of the day, it's all about making each and every golf experience a memorable one. Club Car is honored to be a part of this great game. We'd also be honored to be your business partner. To learn how our creative business solutions can help you, call 1.800.CLUBCAR or visit www.clubcar.com.

THE REVOLUTION CONTINUES.

Precedent began turning heads and earning accolades the moment it was introduced. Four years later, we're at it again. This time with the new Precedent i2 and Precedent i2L.

The Precedent i2 takes what was a revolutionary idea — to bring unprecedented levels of style, performance and reliability to the golf car category — and ramps it up another impressive notch. Equipped with the new Excel™ Electric Drive System — the most advanced electric platform we've ever built — the new Precedent i2 delivers unmatched innovation, efficiency and control to your course and your customers.

The well-appointed Precedent i2L includes all Precedent i2 standard features with an additional upgrade in amenities.

- **Excel™ Electric Drive System.** Innovative new electric drive system specifically designed to meet the needs of the golf market with features and benefits for both the course operator and the golfer. Low motor braking speed, new hill descent assist and innovative speed control options make for an exceptional driving experience and results in increased regenerative braking.
- **Peace of Mind with Mechanical Brakes.** Motor braking delivers a smooth, controlled braking experience and when combined with the reliability of mechanical drums, offers the driver assurance and comfort with a traditional pedal feel and usage.
- **Exclusive Charging System.** The new high capacity charging system reduces charging time and helps extend battery life.
- **360° Bumper.** Protects both body and frame and includes special texture that simplifies cleaning to help maintain the appearance of the car.
- **48-Volt Powerplant.** More efficient to run, and less costly to maintain.
- **SportDrive™ Steering and Suspension.** Creates an invigorating, sports car-like driving experience with nimble acceleration.
- **Powershield™** This innovative protective housing completely safeguards the electrical and power systems, deflects ground debris and channels water away from sensitive areas.
- **11.5 hp Kawasaki® Gas Engine.** Accelerates quickly and reduces noise and vibration, providing a pleasing and comfortable ride.

Backed by years of refinement, the legendary DS features innovations like:

- DS electric models feature the exclusive IQ System™ for efficiency, reliability and the ability to customize the vehicle to a variety of driving requirements.
- DS gas models provide excellent maneuverability and comfort.

Please Note: Vehicles contained throughout this brochure may be shown with additional accessories.

FUNCTIONALITY AND INNOVATION MEET LUXURY.

Presenting the new Precedent i2L. In addition to all the standard features of the Precedent i2, the well-appointed Precedent i2L features an upgrade in amenities. So now you can further differentiate your operation with the finest golf car ever built.

Consider its softer, more comfortable seating and steering wheel. Its 10" aluminum wheels, custom logos and premium windshield. And its simple, yet highly functional dashboard design — with fewer complex curves, it's easier to find personal items and easier to clean. The Precedent i2L delivers on style and innovation — it's engineered to please both the course operator and their customers.

The Excel Electric Drive System continues the evolution of Club Car's highly regarded electric platform. Increased benefits of motor braking and regenerative braking include greater control of the vehicle and a smoother ride. Motor braking speeds near zero also provide the driver with more control and assurance when descending hills. Increased motor braking also improves regenerative braking by capturing and returning more energy to the batteries, which can result in less charging time, increased time on the course and a potential reduction in utility costs.

If your operation prefers gas, the 11.5 hp Kawasaki offers quick acceleration, and smooth, pleasing performance.

Upgraded amenities included on the Precedent i2L:

- 10" rims and aluminum wheels
- Custom club logo on front cowl
- Accent stripe
- Tinted, winged and hinged premium windshield
- Number decals
- Soft-grip steering wheel
- Choice of standard or premium colors
- Canopy storage net
- Choice of one driver-side and one passenger-side accessory
- Choice of premium bag protector (standard) or single point watering system

GENIUS GETS A MAKEOVER.

Presenting the New Precedent i2. The original golf car line that earned industry accolades and inspired imitation has evolved dramatically. Engineered with innovative technologies and must-have conveniences, the Precedent i2 sets the new standard by which all golf cars will be measured.

The Excel Electric Drive System contributes to the Precedent i2's best-in-class performance. Featuring low motor braking speed, hill descent assist, increased regenerative braking, enhanced top speed control and more options for speed range programmability.

The 11.5 hp Kawasaki engine quickly accelerates, and minimizes noise and vibration.

Guests will appreciate the redesigned, stylish dash compartment that provides better visibility and quick access to personal items. Your staff will be pleased at how easy it is to clean.

- True 360° Wraparound Bumper. Wraparound bumpers, combined with 5 mph front and rear impact bumpers, help protect the frame and body.
- Molded-In Color. All body panels have color molded in, helping to maintain the new-car look — customer after customer.
- Monsoon Top. Features the industry's first canopy with true, built-in drain spouts to automatically channel water straight to the ground.
- Ergo Seats. Developed using ergonomic software, seats are larger, taller and more erect for support, proper posture and driving position.
- Spacious Bagwell. With center divider; textured surface prevents bag slippage.
- Functional, Aesthetic Dash. Guests easily find personal items and leave fewer items behind. Large dash compartment, deep sweater basket and available canopy net for the ultimate in storage.
- Internal Canopy Handle. Increases comfort and assurance for drivers and passengers alike.
- FlexiDrink Cup Holders. Accommodates a wide variety of containers.

BEAUTIFUL TO THE EYE. AND THE BOTTOM LINE.

The classic beauty of the DS. This is the golf car that became a legend — and led the way in industry innovations.

The DS electric model features our exclusive IQ System, giving you reliability, efficiency and the ability to customize your vehicle to a wide variety of driving requirements. The enhanced testing and diagnostics of the electric DS makes fleet maintenance simple. This car is filled with features that make playing a round more enjoyable for your customers:

- Self-adjusting rack & pinion steering
- Bumpers
- Multi-position park brake
- Premium tread tires
- 17"6" clearance circle
- Secure dual bag holder
- Comfort-grip steering wheel
